Subject: COVID-19 Response

In response to the coronavirus (COVID-19), Precision BioLogic is acting to ensure the continuity of our product manufacturing and distribution along with our service levels. Currently, we do not anticipate any significant disruptions.

Actions taken thus far to mitigate the impact of COVID-19 include:

- Establishing a COVID-19 response team to monitor the unfolding situation and help ensure continuity of critical operations
- Maximizing inventory levels of raw materials and finished goods
- Working closely with suppliers to avoid or minimize supply chain disruptions
- Educating and supporting our employees to ensure their well-being

We are committed to providing our products and service throughout this situation. Please visit our website <https://precisionbiologic.com> for updates.

Thank you for your trust in Precision BioLogic and our products.

Sincerely,

Paul Empey
President and CEO
